

RUBIKA SRI D

Tamil Nadu, India | +91 9894964916 | rubikasrid.al24@bitsathy.ac.in | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

AI & Machine Learning undergraduate with a strong foundation in Data Structures & Algorithms, Python, and Java, and hands-on experience building end-to-end ML and full-stack applications. Skilled at translating ambiguous problems into working software, from OCR-driven document pipelines to production-style web systems. Fast learner with a growing interest in AI/ML engineering, backend development, and data-driven software design, seeking SDE, AI/ML Engineer, Data Science, or Software Engineering internships.

EDUCATION

Bannari Amman Institute of Technology (BIT) Expected Graduation: 2028

B.Tech, Artificial Intelligence and Machine Learning | CGPA: 7.90 / 10

TECHNICAL SKILLS

Languages: Python, Java, C++, SQL

Machine Learning: Supervised & Unsupervised Learning, Linear Regression, NumPy, Pandas, Matplotlib, Scikit-learn

Data Structures & Algorithms: Arrays, Strings, Linked Lists, Stacks, Queues, Trees, Searching, Sorting, Time Complexity Analysis

Web Technologies: HTML, CSS, JavaScript, React

Databases: MySQL, MongoDB

Tools: Git, GitHub, Google Colab, VS Code, Figma

PROJECTS

LawLens – Smart Legal Document Processing for District Court e-Services

Python, FastAPI, React, MongoDB, Hugging Face Transformers, OCR

- **Engineered** an AI-powered legal document processing pipeline for District Court e-Services, combining OCR and NLP to digitize and structure scanned case files.
- **Built** an automatic legal document summarization module using Hugging Face Transformers, condensing lengthy filings into concise, readable summaries to speed up case review.
- **Developed** a full-stack web application with a FastAPI backend and React frontend, backed by MongoDB, to let court staff upload, search, and retrieve processed documents.
- **Improved** accessibility of court records for non-technical staff by replacing manual document review with an automated, searchable digital workflow.

Entrepreneurship Facilitation Services Processing Centre

e-Governance, Requirement Analysis, User Research

- **Analyzed** e-Governance workflows for MSME-focused government schemes to identify gaps in how entrepreneurs discover and access benefits.
- **Conducted** beneficiary surveys and stakeholder interviews to gather first-hand requirements from MSME owners and scheme administrators.
- **Mapped** end-to-end user journeys for the beneficiary application process, translating findings into actionable requirements for a proposed processing centre platform.

CERTIFICATIONS

- Oracle Certified Java SE 17 Professional
- AWS Certification
- HCL Certification

ACHIEVEMENTS & INTERESTS

- Participant, Smart India Hackathon
- Active learner in Data Structures & Algorithms and Machine Learning, with consistent practice on problem-solving platforms
- Strong and growing interest in Artificial Intelligence and applied ML systems
